

KHALIL BOURGOU

Financial Analyst | FMVA-Certified | Financial Modeling, Valuation & Financial Statement Analysis

Budapest, Hungary | (+36) 70-720-6733 | bourgoukhalil@gmail.com | linkedin.com/in/khalilbourgou

PROFESSIONAL SUMMARY

FMVA-certified analyst and PhD researcher in business administration, pivoting from energy-sector operations analytics into corporate finance. Hands-on experience building DCF and three-statement models, running sensitivity and scenario analysis, and translating financial data into executive dashboards using Excel, Power BI, SQL, and Python. Familiar with IFRS reporting standards. Seeking a Financial Analyst Internship in Milan or Rome to apply valuation, forecasting, and financial statement analysis in a live corporate finance environment.

CORE COMPETENCIES

- **Financial Modeling & Valuation (FMVA):** Three-statement modeling, DCF valuation, comparable company analysis, precedent transactions, sensitivity and scenario analysis, forecasting, executive pitch decks.
- **Financial Statement Analysis:** Income statement, balance sheet, and cash-flow analysis; ratio analysis; variance analysis; budget vs. actual reporting; familiar with IFRS reporting standards.
- **Corporate Finance:** Cost analysis, capital budgeting concepts, unit economics, revenue modeling, working-capital and cash-flow forecasting.
- **Excel (Advanced):** XLOOKUP, INDEX/MATCH, SUMIFS, pivot tables, data tables for sensitivity analysis, dynamic dashboards, macro-enabled workbooks.
- **Data Analytics & BI:** Power BI (data modeling, DAX, dashboards), SQL via Azure Data Studio, Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau.
- **Reporting & Communication:** PowerPoint executive decks, technical reports, data-driven recommendations to operations and executive stakeholders.
- **ERP Systems:** SAP (SD & MM) — sales order processing, procurement workflows, materials management, master data.
- **Languages:** Arabic (Native, C2) • English (Professional, C1) • French (Working, B2) • Italian (Elementary, A1–A2)

FINANCIAL MODELING PROJECTS

DCF Valuation & Three-Statement Model — FMVA Capstone

- Built full three-statement model with year-over-year forecasts of income statement, balance sheet, and cash flow, using advanced Excel functions to make the model dynamic and auditable.
- Performed sensitivity analysis across WACC and terminal growth assumptions, plus scenario analysis (base / bull / bear) and accretion/dilution analysis.
- Produced comparable company analysis and precedent-transactions valuation, consolidated into an executive pitch deck and football-field chart in PowerPoint.

Business Intelligence Dashboard — BIDA Capstone

- Built a Power BI data model against a corporate retail database delivering income-statement and balance-sheet views with drill-down by GL account.
- Extracted and transformed raw financial data using Azure Data Studio (SQL) and Python, and built interactive Tableau dashboards using advanced visuals (candlestick, Bollinger bands, treemap).

PROFESSIONAL EXPERIENCE

Doctoral Researcher & Guest Lecturer

Sep 2025 – Dec 2025

John von Neumann University, Hungary

- Designed and taught a graduate module on *"The Digital Business Revolution: Financial Implications & Valuation"* to a cohort of 20 students, covering DCF valuation, unit economics, and revenue modeling in corporate finance contexts.
- Authored original case studies applying three-statement modeling and unit-economics analysis to digital-business valuation, translating academic frameworks into applied investment narratives.
- Published *"Markov Chain Analysis of Digital Skills Dynamics across Hungary and the European Union"* in Discover Sustainability (Q1 journal, July 2026), applying stochastic modeling and forecasting techniques to EU DESI panel data.
- Awarded First Prize and Audience Award at the EU4DUAL Essay and Dissertation Writing Competition (2025) for evidence-based labor-market policy research selected as the top university-wide submission.

Junior Business Analyst (Remote)

2022 – 2024

Faiad Bergin Oil Services, Libya

- Delivered procurement and cost analysis across a portfolio of 12 active oilrigs and 3 rigs under maintenance, managing supplier operations against a \$3M–\$5M annual operations procurement budget and ~\$2M per-project maintenance spend.
- Reduced operational downtime hours per rig by 12% over the engagement by forecasting spare-parts demand and coordinating supplier lead-times with active project schedules.
- Built and maintained a supplier-performance and spend-analysis database covering 85+ vendors in Power BI and SQL, delivering variance dashboards (budget vs. actual) used by management for cost-recovery decisions.
- Cut management report turnaround time by 30% by restructuring the procurement data model and automating recurring reports in Power BI (DAX) and Excel.
- Produced monthly technical reports and PowerPoint decks for executive stakeholders on procurement performance, cost drivers, and supplier risk, informing budget reallocation across 15 active projects.
- Coordinated procurement, field operations, and management to align material flow with project schedules across 85+ suppliers and 15 active project sites.

Logistics Assistant Intern

2020

Sigma Energy, Tunisia

- Coordinated logistics for 30+ monthly shipments supporting oilfield project operations, working directly with 5+ Superintendents and the Projects Director.
- Reconciled 100+ vendor invoices and packing lists per cycle against purchase orders, improving shipment delivery accuracy by 18% and surfacing billing discrepancies for management review.
- Performed quality and quantity inspections on 1,500+ inbound parts, raising inventory record accuracy from 85% to 97% over a 3-month period and reducing stock-out risk on critical project materials.
- Centralized daily project-activity reporting for 5+ Superintendents and the Projects Director, cutting daily alignment time by ~1.5 hours per team lead.

EDUCATION

PhD, Management and Business Administration

2024 – Present

John von Neumann University, Hungary

- Research focus: labor-market and HR analytics, scientometrics and bibliometrics, web scraping and data analysis for economic research.

MA, Master of Business Administration

2020 – 2022

University of Miskolc, Hungary

- Coursework: Corporate Finance, Accounting, International Economics, Digital Marketing.

SUSI on Entrepreneurship & Economic Development

2019

University of Massachusetts, Amherst, USA

- Coursework: Ideation and Lean Startup, Marketing, Innovation and Sales Management.

BSc, Mechanical Engineering

2016 – 2019

Higher Institute of Technological Studies, Djerba, Tunisia

- Coursework: Market Research, Embedded Systems, Computerized Maintenance Management Systems.

CERTIFICATIONS

Financial Modeling & Valuation Analyst (FMVA) — Corporate Finance Institute, 2022

- Credential ID: 57836377. Covers three-statement modeling, DCF valuation, comparable company analysis, precedent transactions, sensitivity and scenario analysis, and executive dashboards.

Business Intelligence & Data Analyst (BIDA) — Corporate Finance Institute, 2022

- Credential ID: 59848512. Covers Power BI data modeling and DAX, SQL via Azure Data Studio, Python for data analysis, and advanced Tableau visualization.

HONORS & AWARDS

- **First Prize & Audience Award, EU4DUAL Essay and Dissertation Writing Competition (2025)** — John von Neumann University. Awarded for "*Modeling the Dynamics of Digital Skills Development in Hungary and the EU: A Markov Chain Approach*", selected as the top student contribution among university-wide submissions.

ADDITIONAL

- **Volunteer**, Concordia — "Together, Liven Up the Districts" (France, 2021); European Solidarity Corps project, Le Mans, France.
- **Driver's License**: Category B.
